

Art. 8725.03 Tapered melter

Date last modified: 5-8-2022, Changes reserved for printing- and typing errors.

Product image

Product information

The tapered melter is a heated block that melts dipped candles in a simple manner. The plate is provided with openings at the bottom to drain the excess melted candle wax. This is collected by means of a collecting tray and can then be melted again.

Installation

1. Always place the melter on a stable surface.
2. Connect the device to an earthed socket with 230 Volt.
3. Switching on the device is done by inserting the plug into the socket. Switching off is done by removing the plug from the socket again.
4. The melter is ready for use.

Use of appliance

1. Switch on the device by inserting the plug into the socket.
2. Wait until the block is completely heated through. (Approx. 10 minutes warm-up time).
3. When the melter is fully at temperature, place the candle that has to be melted with the bottom in the recess. Melt the bottom of the candle with a rotating movement. Make sure the candle is held horizontally.
4. After using the appliance, switch off the appliance by removing the plug from the socket.

Note!

The melter needs time to heat up (approx. 1/2 hour). The block can get hot, but it won't get extremely hot. Take this into consideration. Never use the melting plate for improper use. This is to prevent damage and increase the lifespan. Improper use also invalidates the warranty.

Cleaning

1. Make sure the plug is out of the socket.
2. The block is easy to clean with polishing paper while it is still warm.
3. Attention! Never bring the device into contact with water.
4. After this cleaning, the device is ready for use again.

Specifications

Plate length	250mm
Plate width	200mm
Wattage	80Watt
Voltage	230Volt

Warranty

The tapered melter comes with a one-year warranty against material and construction defects, provided that the device has been used and maintained in accordance with the instructions. Also, the melting chain must not be mishandled or abused in any way. This only applies to parts, not to labor and transport. In the event of malfunctions, please contact your supplier in order to have the malfunction resolved with the original parts.

Warning: as this involves heating a liquid, operation of the melting tank should only be done by qualified personnel.

The device complies with EU directives 73/23 EEC and 89/336 EEC, all technical changes reserved.

Electric scheme

Always read the manual before using the device
